EXPERIENCE

• Software Engineer L2

Gemini Solutions

Feb 2023 – Present

Gurugram, India

- Engineered scalable Angular applications focusing on performance optimization, accessibility, and maintainability, accelerating feature delivery by 40%.
- Led migration from **Angular 14 to Angular 19** and transitioned UI components from **Angular Material to PrimeNG**, improving scalability and reducing load time by 25%.
- Adopted NgRx-based state management, minimizing redundant API calls by 30% and strengthening data flow efficiency across modules.
- Collaborated within an Agile Scrum environment, consistently achieving 95% sprint completion through effective planning and team coordination.
- Mentored 4+ developers and enforced UI best practices, reducing code review cycles by 25% and elevating overall code quality.
- Enhanced large-scale data rendering using pagination, infinite scrolling, and debouncing, improving UI responsiveness by 35%.
- Orchestrated REST API integrations with backend teams, lowering latency by 20% and improving asynchronous data handling.
- Designed reusable SCSS components and responsive layouts, reducing UI inconsistencies by 30% while ensuring WCAG accessibility compliance.
- Applied advanced RxJS patterns (debouncing, switchMap, caching) to efficiently manage asynchronous data streams in high-traffic modules.

PROJECTS

• Real-Time Incident Platform

Frontend Developer — Angular, TypeScript, Bootstrap, Angular Material

- Spearheaded development of a full-featured incident management system from scratch, establishing modular architecture and lazy loading.
- Refined state management strategy, reducing API calls by 40% and boosting overall application performance.
- Developed responsive dashboards and interactive charts using Chart.js, enabling real-time operational decision-making.
- Collaborated on API design and enabled secure SSO authentication, ensuring seamless and secure system integration.

• Employee Payroll System

Frontend Developer — Angular, TypeScript, Angular Material

- Developed a responsive payroll system to manage employee compensation and investment declarations.
- Executed API integrations with high accuracy and applied debouncing in search operations, boosting efficiency by 30%.
- Strengthened code reusability and accessibility compliance through modular architecture and Material Design standards.

• Investment Analytics Portal

Frontend Developer — Angular, PrimeNG, Bootstrap

- Designed dynamic charts, data tables, and robust form validations for financial analytics and tracking.
- Improved change detection strategy, boosting page performance by 20% and enhancing rendering efficiency.
- Enhanced responsive UI and cross-browser compatibility using PrimeNG components.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Python
- Frameworks:** Angular, React, NgRx, Redux, Bootstrap, PrimeNG, Angular Material, Chart.js, Ionic
- Concepts:** Performance Optimization, Scalable Architecture, Reusable Components, API Optimization, Cross-Browser Compatibility
- Tools:** Git, GitHub, VS Code, Postman, Chrome DevTools

CERTIFICATIONS

- GitHub Copilot (GH-300) by Microsoft Learn
- Angular (Basic) by HackerRank
- Angular (Intermediate) by HackerRank
- JavaScript (Intermediate) by HackerRank

EDUCATION

• B.Tech. in Computer Science Engineering

Dr. A.P.J. Abdul Kalam Technical University

Aug 2019 – Jun 2023

Bareilly, UP

ACHIEVEMENTS

- Received **Rising Star Award** for consistent high-quality frontend delivery and leadership in mentoring peers.
- Secured a merit-based **INR 50,000 scholarship** for academic excellence during undergraduate studies.
